STEP 1 Read and understand all steps in the instructions before starting the installation. Park the motorcycle on a hard, level surface and turn off the ignition. Let motorcycle cool.

STEP 2 Remove the two screws that secure the taillight lens to the base. PIC 1 Set these aside, they may be reused.

STEP 3 Test fit the cover in place over the taillight lens, and check for clearance between the cover and the fender. PIC 2 If the cover touches the fender, it may cause damage to the paint; the spacers have been included to prevent the visor from contacting the fender.

Note: If the cover does touch the fender, install the nylon spacers on the backside of the installation tabs by removing the adhesive backing on the spacer and placing them on the tabs as shown in PIC 3.

CAUTION ENSURE THAT THE COVER WILL NOT TOUCH THE FENDER, WHICH MAY RESULT IN DAMAGE TO THE PAINT. KURYAKYN IS NOT RESPONSIBLE FOR DAMAGE TO PAINT/FENDER DUE TO IMPROPER INSTALLATION.

STEP 4 If the spacers are not needed place the cover over the taillight lens and secure the cover and lens with the OEM screws removed in Step 2. If the OEM screws DO NOT snug up the lens and cover in at LEAST three full turns, or if the spacers from Step 3 are used, use the included #8-32 x1-1/4" Phillips Head screws; DO NOT OVER TIGHTEN them or you may damage the cover or taillight lens.
